Brazil: Proposing an UBS election polls aggregator

Economics

Americas

It is all about elections

In less than five months, Brazil will hold presidential elections. The first round of the presidential election will be held on 2 October; if no candidate reaches 50% +1 of valid votes, there will be a second round of voting on 30 October, following which the next President of Brazil will be declared.

There is a plethora of polls being released, with traditional polling institutes and newcomers all providing polling numbers for both rounds. However, the candidates have not yet been determined; by law they will be officially announced in early August.

But according to a number of political consultants, polling specialists and media pundits, the main contenders are widely known. They are: 1) sitting President Mr. Jair Bolsonaro; 2) former President Mr. Luis Inácio Lula da Silva (Lula); 3) former governor and former minister Mr. Ciro Gomes; and 4) former governor of São Paulo Mr. João Doria.

There are several other potential candidates, but in every poll published so far they would have less than 3% of votes, so we aggregate them in 'others' for the purpose of this study. Sergio Moro [withdrew](#) his pre-candidacy and, for practical purposes, all candidates other than the four named above, will appear as 'other' in our analysis throughout this report.

Different polls/methodologies: how can we aggregate and what can we learn?

There are many different polls being produced in Brazil with different methodologies, processes of collecting data, and sample sizes. In the US, Nate Silver's blog "FiveThirtyEight" aggregates different polls for US elections, tries to determine an aggregate by combining all the polls, and releases his results [here](#). Inspired by his work, we have spent the last month studying and selecting different methodologies for the best unbiased aggregation we could produce.

In Part I of this report, Fabio Ramos studied different aggregation methodologies and produced an assessment of where we are in terms of vote intentions for the first round, as well as an aggregator for the second round with only President Bolsonaro and former President Lula, who are by far the two leading candidates in every poll released to date. In Part II, we analyse the results and comment on possible biases in the results we observed.

Part I: Election polls aggregator implementation

Polling and elections

We have seen in past years an increase in public opinion surveys and polls [worldwide](#), given the advances in technology and reduced cost of polling. In election seasons, the demand from analysts, political commentators, the press and the overall population is even higher, and the Brazil presidential elections this year are no exception.

Processing a lot of information

Based on the 12 currently available public polls (we expect this number to grow) and considering their different methodologies, we propose an "aggregator" to extract what they have in common. Most show comparable trends, but with different confidence intervals, numbers of interviewed electors, interviewing days, publication frequency and type of interview (by phone or internet survey, in person or visiting households). We have gathered the last two years of publicly available data for these polls and detail their main characteristics in the Appendix.

Aggregator methodology

We have implemented a state-space model to summarize what polls show as a whole. It is not an inference about the election's final outcome, but simply a way to better compare and read a profusion of not exactly compatible data. We used the same method for the likely main scenario according to current polls for both the first round and run-off.

2022 election

Brazilians will go to the voting booths on 2 October to elect the President, a third of the Senate, the entire Lower Chamber, all 27 governors, and local legislatures. If no candidates for the Presidency or the governorships (the 'major positions') receive 50% + 1 of valid votes (meaning more than the sum of all other candidates), a second round of voting will take place on 30 October. Based on the official [schedule](#), we have summarized the key dates in Figure 1 below. In fact, this report is an update and development on our September 2021 note (see [Early thoughts for 2022](#)).

Figure 1: Brazil's elections key dates

August 5	Deadline for party conventions
August 15	Deadline for candidates enrollment
August 16	Beginning of official campaign
September 29	Last day for electoral debates and first round TV campaign
October 2	First round elections
October 7	Start of second round TV campaign
October 28	Last day of second round TV campaign
October 30	Second round elections
January 1, 2023	Presidential inauguration

Source: gov.br, TSE, UBS

Just as an example, Figures 2-3 show a snapshot of the first round voting intentions for the two current front-runners, the incumbent President Bolsonaro and former President Lula, in all 12 polls. We note that at present, all names are considered "pre-candidates" since candidates' official registration with the electoral court occurs in August (deadline of 15 August).

Figure 2: Former President Lula first round voting intentions (%)

Source: Atlas, Datafolha, Futura, FSB, Ideia Big Data, MDA, IPEC, PoderData, IPESPE, Paraná Pesquisas, Quaest, Sensus, UBS

Figure 3: President Bolsonaro first round voting intentions (%)

Source: Atlas, Datafolha, Futura, FSB, Ideia Big Data, MDA, IPEC, PoderData, IPESPE, Paraná Pesquisas, Quaest, Sensus, UBS

The first thing we would note is the data dispersion, most likely due to the different methodologies of the polls. Our objective in this report is to develop and apply a method to consider different polls without any prejudgment in terms of saying which poll is 'good' or 'bad'. In a way, the goal is to determine if it is possible to find a common trend between all the polls, letting the data 'speak' and avoiding rules of thumb and controversial adjustments like simple interpolation, and taking simple moving averages from not exactly compatible polls.

The election polls aggregator

Proposing an aggregator to summarize a group of polls into a single metric is not straightforward. Further, in each electoral cycle new pollsters join or leave the market, and from time to time we get notice of new polling methods.

More and more surveys are being made through electronic calls, but some polls continue to interview people on the streets or at their homes. The former method is more common and usually less expensive. The latter methods are usually more expensive, but they also usually provide more statistically robust results, particularly if an analyst is interested in the candidates' levels of support instead of voting dynamics in a period of time.

Polls might be good to infer a candidate's level of support, but we stress that even a not-so-good survey in terms of stratification or number of interviewees may provide useful information if conducted with some frequency and with the same methodology. Most importantly, we think it is necessary to use all available data and let some econometric method decide which information is really significant or not.

To do so, we implemented what we call a linear Kalman filter state-space model⁽¹⁾ in which an observable voting intention "y" for each candidate "i" in a given pollster "j" in a given moment of time "t" takes the following form:

$$(1) \quad y_{i,j,t} = Z_{i,t} + \epsilon_{i,t} ;$$

$$(2) \quad Z_{i,t} = Z_{i,t-1} + v_{i,t} ;$$

$$\epsilon_{i,t} \sim N(0; \sigma_{\epsilon,i}) ;$$

$$v_{i,t} \sim N(0; \sigma_{v,i})$$

The variable "Z_{i,t}" is an unknown and we call it a "state" variable. In our case, we can call Z_{i,t} a line which captures a pattern among all polls for each candidate "i", and we take for granted well-behaved disturbances, following a Normal distribution.

The more data that is available, the more the system should be able to detect if they are informative or not to the common pattern. And herein lies a resemblance with principal component analysis (PCA). However, standard PCA requires a full data panel. This is not the case with the Kalman, which is useful in dealing with missing values and non-regular data—which is typically the case in public opinion surveys.

The biggest disadvantage is that the estimate is highly sensitive to initial conditions, variables covariances and, as usual, the model structure itself. We preferred to keep "y_{i,j,t}" as simple as possible, since with 12 polls and several candidates the number of parameters to be estimated is about 80. Polls that are more affine/correlated tend to push the system solution (the trend) towards them. More volatile polls usually lose 'power' over the common line. Finally, more frequent polls also gain 'power' over the system.

We tracked voting intentions for the abovementioned four front-runners:

1. The incumbent, President Bolsonaro (from the PL party);
2. Former President Lula (2003-2010, from the PT party);
3. Ciro Gomes, former Ceará state governor (PDT); and
4. João Doria, former São Paulo state governor (PSDB).

We included all other potential (and former) candidates in the "Others" category. We also added a group with "Blank, Null and Don't know or No answer".

Now, we can reassess Figure 2 and Figure 3, but adding our modelled common trend, or, as we prefer to call it, a modelled "polls aggregator" (Z_{i,t}) (Figures 4 and 5).

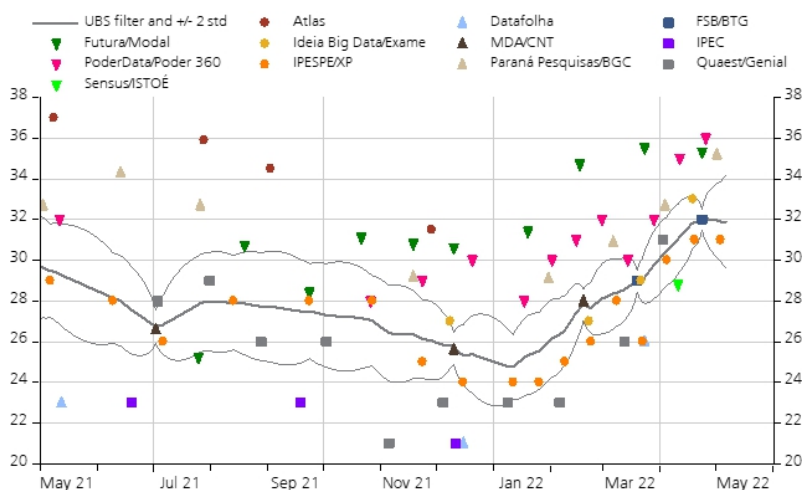

^{1.} More details are available in Koopman, Siem Jan, Neil Shephard, and Jurgen A. Doornik (1999). "Statistical Algorithms for Models in State Space using SsfPack 2.2," *Econometrics Journal*, 2(1), 107-160.

Figure 4: Lula first-round voting intentions (%)

Source: UBS calculations as per aggregating the public polls

Figure 5: Bolsonaro first-round voting intentions (%)

Source: UBS calculations as per aggregating the public polls

In Figure 6 and Figure 7 we chart the voting intentions for Ciro Gomes and João Doria. Figures 8 and 9 show the same for the "others" candidates together and "don't know, no answer and null voting".

Figure 6: Ciro Gomes first-round voting intentions (%)

Source: UBS calculations as per aggregating the public polls

Figure 7: João Doria first-round voting intentions (%)

Source: UBS calculations as per aggregating the public polls

Figure 8: "Others" first-round voting intentions (%)

Source: UBS calculations as per aggregating the public polls

Figure 9: Don't know or no answer first-round voting intentions (%)

Source: UBS calculations as per aggregating the public polls

Finally, we show in Figure 10 all the candidates' voting intentions aggregation curves (Z_{it}) together:

Figure 10: First round voting intentions estimates (%)

Source: UBS calculations as per aggregating the public polls

It is important to stress that all these computations are not intended to predict the election's outcome, but rather to 'summarize' what we can apprehend from a variety of pollsters. This work does not make any inference about the quality of polls or their correlation to final election results.

The main run-off scenario

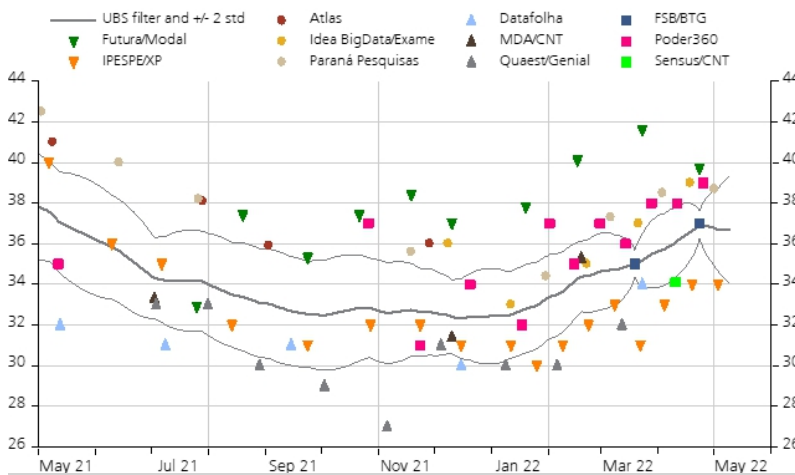

We implemented the same methodology for the most likely run-off scenario according to polls: Lula and Bolsonaro.

Figure 11: Run-off - Lula (%)

Source: UBS calculations as per aggregating the public polls

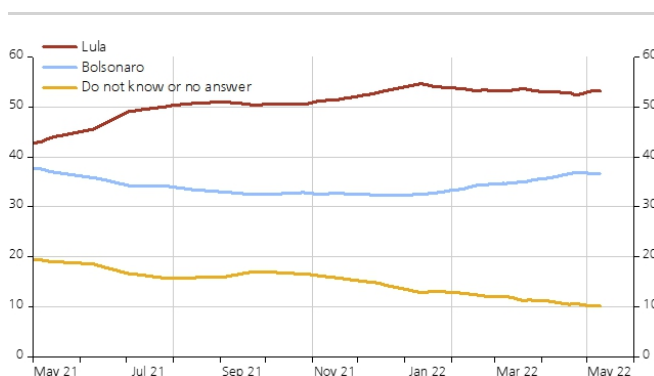

Figure 12: Run-off - Bolsonaro

Source: UBS calculations as per aggregating the public polls

Finally, our aggregator for the run-off ($Z_{i,t}$) in total votes and valid votes (excluding don't know and no answers):

Figure 13: Run-off voting intentions estimates (%)

Source: UBS calculations as per aggregating the public polls

Figure 14: Run-off voting intentions estimates (% of valid votes)

Source: UBS calculations as per aggregating the public polls

Part II: Analysing the results of the election polls aggregator

After modelling the aggregator, the main objective is to "separate the wheat from the chaff." As different polls are available and they sometimes have very different results in terms of levels—although all currently show former President Lula in the lead—a more detailed analysis for the first and second rounds is very important.

First round analysis

Lula

After the Supreme Court decided to annul the judgments in Curitiba regarding former President Lula, he became eligible to run in the election and become a pre-candidate. Since his eligibility became known, there has been a steady increase in his vote intentions in every poll. According to our aggregator, this increased from 32% in May 2021 to 42% in October 2021. Over the same period (May 2021 to October 2021) our aggregator shows a 7ppt drop in vote intentions in the "Others" category, a 1ppt fall in undecided and a 2ppt drop in voting intentions for President Bolsonaro. Since then, vote intentions for former president Lula have been reasonably stable at around 43% (Figure 4).

Bolsonaro

In May 2021 Bolsonaro had a vote intention of 30%, which progressively decreased to 25% in mid-January, but has since regained traction back to 32% (as of early May), according to our aggregator. The initial reduction in support until October 2021 corresponds to Lula's increase in support and, from October to January, to increased vote intentions for other candidates, most notably Former Federal Judge Sergio Moro (who has already resigned as a candidate). The increase after January until Moro gave up his candidacy on 31 March is also likely from "Others" and undecided (which fell 1-2ppt each), helping Bolsonaro reach 30%. The last leg of improvement corresponds to a reduction in voting intentions for "Others" (mostly Moro), over which period President Bolsonaro gained another 2 percentage points (Figure 5).

Ciro Gomes

His vote intentions have been very stable, at 6-7%, with no material change in the analysed period. It is reasonable to infer a very stable and faithful electoral base. We also note a significant volatility difference between polling institutions on his results: the lowest was 3% for one institution and as high as 11% in another. Different samples and methodologies might explain this, but in our aggregator he is very much stable (Figure 6).

João Doria

Stable between 3-4% in the period from May to October 2021. After October he lost momentum until March 2022, reaching 2%, and returned to 3% after Moro gave up his candidacy (Figure 7).

Others

This category was much more significant due to Sergio Moro's presence in the pack, but declined markedly, from around 10-13% before March (when Moro left the race) to 4%. The absence of former judge Moro appears to have increased Bolsonaro vote intentions in our aggregator (Figure 8).

Don't know, no answer or blank/null

This was 12% in the beginning of the period analysed and has been very stable at around 10-11% since November (Figure 9).

Second round analysis

Lula

Vote intentions for the former President in the second round have been similar to those in the first round: an increase from 43% to 51% between May and October 2021, and around 51-55% since November with the last result (as of early May) at 53%. Former President Lula gained and then lost some of the undecided votes (Figure 11).

Bolsonaro

For the sitting president there have also been two distinct movements (also analogous to the first round intentions): a steady decrease from May 2021 (at around 38%) to January 2022 (reaching 32%) and a recovery since January, reaching 37% as of May 2022. Undecided votes have fallen from 17% to 13% over the same period (Figure 12).

Don't know, no answer or blank/null

The larger number of undecided voters in comparison to the first round was notable, but the difference was reduced as the likelihood of a second round between Bolsonaro and Lula became more evident (Figure 15).

Figure 15: Don't know or no answer (%)

Source: UBS calculations as per aggregating the public polls

Additional interesting comparisons using the aggregator

Comments on Lula voting intentions

Lula's vote intention in the second round is around 10ppt higher than in the first (Figure 18) and the difference between the first and second rounds is very stable. Some analysts believe this indicates a potential ceiling for Lula's support and that there may be more downside than upside in vote intentions for Lula (see [here](#) and [here](#)).

One interesting comparison is adding the vote intentions for Ciro Gomes to Lula's vote intentions in the first round, and comparing this second round vote intention Lula (Figure 17). Since Ciro Gomes is seen as a leftist candidate, some pollsters believe voter intentions for Ciro Gomes could be potential votes for Lula in the second round (see [here](#)). The correlation is very straightforward.

Figure 16: Lula first- and second-round voting intentions (%)

Source: UBS calculations as per aggregating the public polls

Figure 17: Lula and Ciro Gomes first-round voting intentions vs. Mr. Lula run-off (%)

Source: UBS calculations as per aggregating the public polls

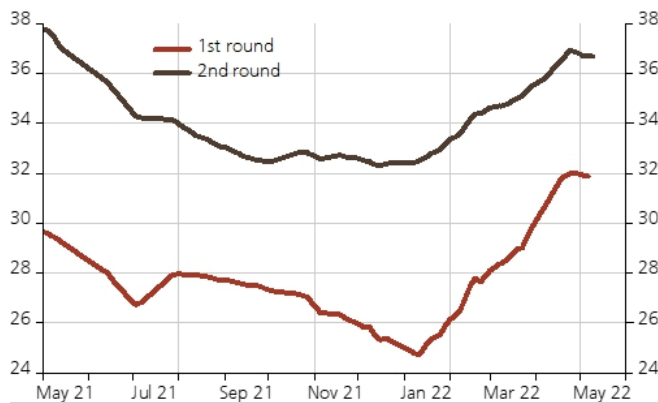

Comments on Bolsonaro voting intentions

The increase in first to second voter intentions for Bolsonaro is lower than that for Lula. In Bolsonaro's case it rises from 32% to 37%, and attribute this to his higher rejection rate⁽²⁾ than former President Lula.

When adding Doria's (a center-right candidate) first round vote intentions to Bolsonaro's vote intentions, and comparing them to Bolsonaro's second-round vote intentions, the difference is less than 2ppt. As the remaining candidates have only around 3-4% of vote intentions now, we think it is fair to infer that those votes are still undecided.

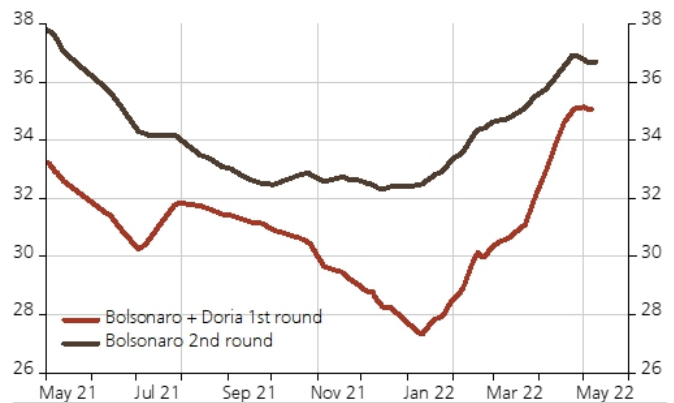

². Rate of interviewees that declares they would not vote for a candidate under any circumstances.

Figure 18: Bolsonaro first- and second-round voting intentions (%)

Source: UBS calculations as per aggregating the public polls

Figure 19: Bolsonaro and Doria first-round voting intentions vs. Mr. Bolsonaro run-off (%)

Source: UBS calculations as per aggregating the public polls

Change in electoral results from our aggregator

The difference in vote intentions in the second round from Lula and Lula + Ciro (in the first round) and also from Bolsonaro and Bolsonaro + Doria (in the first round) is not very large (less than 4% in each case, see Figure 20). So the pool of remaining available voters will be from undecided or declared blank/null votes. As of May, Lula has 59% of valid votes and Bolsonaro 41% according to our aggregator.

Figure 20: Difference from voting intentions (ppts)

Source: UBS calculations as per aggregating the public polls

The economic situation in Brazil could have a bearing on vote intentions. Some improvement in inflation and employment might marginally benefit the sitting President. If that is the case, there could be some increase in vote intentions for Bolsonaro in the coming months and some reduction in vote intentions for Lula, although neither seems likely to be very significant.

Stay tuned. We will be updating this aggregator with a higher frequency as more polls become available.

(continues overleaf)

Some final takeaways

1. In past years the number of public opinion polls has increased significantly due to declining costs.
2. They differ in methodology and publication frequency.
3. According to a dozen polls, the main contenders are Lula and Bolsonaro.
4. Our aggregator tries to extract a common component " $Z_{i,t}$ " for the main candidates from several polls. It does not represent a forecast for election day, but simply a summary of several different, but correlated polls.
5. Our aggregator shows Lula leading the first round with 43% followed by Bolsonaro with 32%.
6. For the run-off, our computation shows Lula ahead of Bolsonaro by 53% vs. 37%.
7. In valid votes (adjusting for blank, null, no answer and redistributing "don't know") this would be 59% vs. 41%. This is how elections are reported on ballots: only valid votes.

Valuation Method and Risk Statement

Risks include macroeconomic variables (such as GDP growth rates and inflation), economic slowdown, a weakening currency, global economic events, and government policy changes. Also, in addition to industry and company specific risk, we point out to investors the potential risks inherent in investing in companies with significant assets and business operations in GEM. Potential emerging market related risks include, but are not limited to, the volatile nature of the currency, regulatory and socio-political risk, and abrupt potential changes in the cost of capital and economic growth outlook. Valuations can also be impacted by “contagion” from developments in other emerging markets. Each of these above has the potential to significantly impact company/industry performance.

Required Disclosures

This report has been prepared by UBS Brasil CCTVM S.A., an affiliate of UBS AG. UBS AG, its subsidiaries, branches and affiliates are referred to herein as UBS.

For information on the ways in which UBS manages conflicts and maintains independence of its research product; historical performance information; certain additional disclosures concerning UBS research recommendations; and terms and conditions for certain third party data used in research report, please visit <https://www.ubs.com/disclosures>. The figures contained in performance charts refer to the past; past performance is not a reliable indicator of future results. Additional information will be made available upon request. UBS Securities Co. Limited is licensed to conduct securities investment consultancy businesses by the China Securities Regulatory Commission. UBS acts or may act as principal in the debt securities (or in related derivatives) that may be the subject of this report. This recommendation was finalized on: 12 May 2022 04:20 AM GMT. UBS has designated certain Research department members as Derivatives Research Analysts where those department members publish research principally on the analysis of the price or market for a derivative, and provide information reasonably sufficient upon which to base a decision to enter into a derivatives transaction. Where Derivatives Research Analysts co-author research reports with Equity Research Analysts or Economists, the Derivatives Research Analyst is responsible for the derivatives investment views, forecasts, and/or recommendations. **Quantitative Research Review:** UBS publishes a quantitative assessment of its analysts' responses to certain questions about the likelihood of an occurrence of a number of short term factors in a product known as the 'Quantitative Research Review'. Views contained in this assessment on a particular stock reflect only the views on those short term factors which are a different timeframe to the 12-month timeframe reflected in any equity rating set out in this note. For the latest responses, please click <https://neo.ubs.com/quantitative>, or speak to your UBS sales representative for access to the report.

Analyst Certification:

Each research analyst primarily responsible for the content of this research report, in whole or in part, certifies that with respect to each security or issuer that the analyst covered in this report: (1) all of the views expressed accurately reflect his or her personal views about those securities or issuers and were prepared in an independent manner, including with respect to UBS, and (2) no part of his or her compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by that research analyst in the research report.

Research analysts contributing to this report who are employed by any non-US affiliate of UBS Securities LLC are not registered/qualified as research analysts with FINRA. Such analysts may not be associated persons of UBS Securities LLC and therefore are not subject to the FINRA restrictions on communications with a subject company, public appearances, and trading securities held by a research analyst account. The name of each affiliate and analyst employed by that affiliate contributing to this report, if any, follows.

This document is a general communication and is educational in nature; it is not an advertisement nor is it a solicitation or an offer to buy or sell any financial instruments or to participate in any particular trading strategy. Nothing in this document constitutes a representation that any investment strategy or recommendation is suitable or appropriate to an investor's individual circumstances or otherwise constitutes a personal recommendation. By providing this document, none of UBS or its representatives has any responsibility or authority to provide or have provided investment advice in a fiduciary capacity or otherwise. Investments involve risks, and investors should exercise prudence and their own judgment in making their investment decisions. None of UBS or its representatives is suggesting that the recipient or any other person take a specific course of action or any action at all. By receiving this document, the recipient acknowledges and agrees with the intended purpose described above and further disclaims any expectation or belief that the information constitutes investment advice to the recipient or otherwise purports to meet the investment objectives of the recipient. The financial instruments described in the document may not be eligible for sale in all jurisdictions or to certain categories of investors.

Options, structured derivative products and futures (including OTC derivatives) are not suitable for all investors. Trading in these instruments is considered risky and may be appropriate only for sophisticated investors. Prior to buying or selling an option, and for the complete risks relating to options, you must receive a copy of "The Characteristics and Risks of Standardized Options." You may read the document at <http://www.theocc.com/publications/risks/riskchap1.jsp> or ask your salesperson for a copy. Various theoretical explanations of the risks associated with these instruments have been published. Supporting documentation for any claims, comparisons, recommendations, statistics or other technical data will be supplied upon request. Past performance is not necessarily indicative of future results. Transaction costs may be significant in option strategies calling for multiple purchases and sales of options, such as spreads and straddles. Because of the importance of tax considerations to many options transactions, the investor considering options should consult with his/her tax advisor as to how taxes affect the outcome of contemplated options transactions.

Mortgage and asset-backed securities may involve a high degree of risk and may be highly volatile in response to fluctuations in interest rates or other market conditions. Foreign currency rates of exchange may adversely affect the value, price or income of any security or related instrument referred to in the document. For investment advice, trade execution or other enquiries, clients should contact their local sales representative.

The value of any investment or income may go down as well as up, and investors may not get back the full (or any) amount invested. Past performance is not necessarily a guide to future performance. Neither UBS nor any of its directors, employees or agents accepts any liability for any loss (including investment loss) or damage arising out of the use of all or any of the Information.

Prior to making any investment or financial decisions, any recipient of this document or the information should take steps to understand the risk and return of the investment and seek individualized advice from his or her personal financial, legal, tax and other professional advisors that takes into account all the particular facts and circumstances of his or her investment objectives.

Any prices stated in this document are for information purposes only and do not represent valuations for individual securities or other financial instruments. There is no representation that any transaction can or could have been effected at those prices, and any prices do not necessarily reflect UBS's internal books and records or theoretical model-based valuations and may be based on certain assumptions. Different assumptions by UBS or any other source may yield substantially different results.

No representation or warranty, either expressed or implied, is provided in relation to the accuracy, completeness or reliability of the information contained in any materials to which this document relates (the "Information"), except with respect to Information concerning UBS. The Information is not intended to be a complete statement or summary of the securities, markets or developments referred to in the document. UBS does not undertake to update or keep current the Information. In no circumstances may this document or any of the Information (including any forecast, value, index or other calculated amount ("Values")) be used for any of the following purposes:

- (i) valuation or accounting purposes;
- (ii) to determine the amounts due or payable, the price or the value of any financial instrument or financial contract; or
- (iii) to measure the performance of any financial instrument including, without limitation, for the purpose of tracking the return or performance of any Value or of defining the asset allocation of portfolio or of computing performance fees.

By receiving this document and the Information you will be deemed to represent and warrant to UBS that you will not use this document or any of the Information for any of the above purposes or otherwise rely upon this document or any of the Information.

UBS has policies and procedures, which include, without limitation, independence policies and permanent information barriers, that are intended, and upon which UBS relies, to manage potential conflicts of interest and control the flow of information within divisions of UBS and among its subsidiaries, branches and affiliates. For further information on the ways in which UBS manages conflicts and maintains independence of its research products, historical performance information and certain additional disclosures concerning UBS research recommendations, please visit <https://www.ubs.com/disclosures>.

Research will initiate, update and cease coverage solely at the discretion of UBS Research Management, which will also have sole discretion on the timing and frequency of any published research product. The analysis contained in this document is based on numerous assumptions. All material information in relation to published research reports, such as valuation methodology, risk statements, underlying assumptions (including sensitivity analysis of those assumptions), ratings history etc. as required by the Market Abuse Regulation, can be found on UBS Neo. Different assumptions could result in materially different results.

The analyst(s) responsible for the preparation of this document may interact with trading desk personnel, sales personnel and other parties for the purpose of gathering, applying and interpreting market information. UBS relies on information barriers to control the flow of information contained in one or more areas within UBS into other areas, units, groups or affiliates of UBS. The compensation of the analyst who prepared this document is determined exclusively by research management and senior management (not including investment banking). Analyst compensation is not based on investment banking revenues; however,

compensation may relate to the revenues of UBS and/or its divisions as a whole, of which investment banking, sales and trading are a part, and UBS's subsidiaries, branches and affiliates as a whole.

For financial instruments admitted to trading on an EU regulated market: UBS AG, its affiliates or subsidiaries (excluding UBS Securities LLC) acts as a market maker or liquidity provider (in accordance with the interpretation of these terms under English law or, if not carried out by UBS in the UK the law of the relevant jurisdiction in which UBS determines it carries out the activity) in the financial instruments of the issuer save that where the activity of liquidity provider is carried out in accordance with the definition given to it by the laws and regulations of any other EU jurisdictions, such information is separately disclosed in this document. For financial instruments admitted to trading on a non-EU regulated market: UBS may act as a market maker save that where this activity is carried out in the US in accordance with the definition given to it by the relevant laws and regulations, such activity will be specifically disclosed in this document. UBS may have issued a warrant the value of which is based on one or more of the financial instruments referred to in the document. UBS and its affiliates and employees may have long or short positions, trade as principal and buy and sell in instruments or derivatives identified herein; such transactions or positions may be inconsistent with the opinions expressed in this document.

Within the past 12 months UBS AG, its affiliates or subsidiaries may have received or provided investment services and activities or ancillary services as per MiFID II which may have given rise to a payment or promise of a payment in relation to these services from or to this company.

United Kingdom: This material is distributed by UBS AG, London Branch to persons who are eligible counterparties or professional clients. UBS AG, London Branch is authorised by the Prudential Regulation Authority and subject to regulation by the Financial Conduct Authority and limited regulation by the Prudential Regulation Authority. **Europe:** Except as otherwise specified herein, these materials are distributed by UBS Europe SE, a subsidiary of UBS AG, to persons who are eligible counterparties or professional clients (as detailed in the Bundesanstalt für Finanzdienstleistungsaufsicht (BaFin) Rules and according to MiFID) and are only available to such persons. The information does not apply to, and should not be relied upon by, retail clients. UBS Europe SE is authorised by the European Central Bank (ECB) and regulated by the BaFin and the ECB. **Germany:** Where an analyst of UBS Europe SE has contributed to this document, the document is also deemed to have been prepared by UBS Europe SE. In all cases it is distributed by UBS Europe SE and UBS AG, London Branch. **Luxembourg, the Netherlands, Belgium and Ireland:** Where an analyst of UBS Europe SE has contributed to this document, the document is also deemed to have been prepared by UBS Europe SE. In all cases it is distributed by UBS Europe SE and UBS AG, London Branch. **Turkey:** Distributed by UBS AG, London Branch. No information in this document is provided for the purpose of offering, marketing and sale by any means of any capital market instruments and services in the Republic of Turkey. Therefore, this document may not be considered as an offer made or to be made to residents of the Republic of Turkey. UBS AG, London Branch is not licensed by the Turkish Capital Market Board under the provisions of the Capital Market Law (Law No. 6362). Accordingly, neither this document nor any other offering material related to the instruments/services may be utilized in connection with providing any capital market services to persons within the Republic of Turkey without the prior approval of the Capital Market Board. However, according to article 15 (d) (ii) of the Decree No. 32, there is no restriction on the purchase or sale of the securities abroad by residents of the Republic of Turkey. **Poland:** Distributed by UBS Europe SE (spółka z ograniczoną odpowiedzialnością) Oddział w Polsce regulated by the Polish Financial Supervision Authority. Where an analyst of UBS Europe SE (spółka z ograniczoną odpowiedzialnością) Oddział w Polsce has contributed to this document, the document is also deemed to have been prepared by UBS Europe SE (spółka z ograniczoną odpowiedzialnością) Oddział w Polsce. **Russia:** Prepared and distributed by UBS Bank (OOO). Should not be construed as an individual Investment Recommendation for the purpose of the Russian Law - Federal Law #39-FZ ON THE SECURITIES MARKET Articles 6.1-6.2. **Switzerland:** Distributed by UBS AG to persons who are institutional investors only. UBS AG is regulated by the Swiss Financial Market Supervisory Authority (FINMA). **Italy:** Prepared by UBS Europe SE and distributed by UBS Europe SE and UBS Europe SE, Italy Branch. Where an analyst of UBS Europe SE, Italy Branch has contributed to this document, the document is also deemed to have been prepared by UBS Europe SE, Italy Branch. **France:** Prepared by UBS Europe SE and distributed by UBS Europe SE and UBS Europe SE, France Branch. Where an analyst of UBS Europe SE, France Branch has contributed to this document, the document is also deemed to have been prepared by UBS Europe SE, France Branch. **Spain:** Prepared by UBS Europe SE and distributed by UBS Europe SE and UBS Europe SE, Spain Branch. Where an analyst of UBS Europe SE, Spain Branch has contributed to this document, the document is also deemed to have been prepared by UBS Europe SE, Spain Branch. **Sweden:** Prepared by UBS Europe SE and distributed by UBS Europe SE and UBS Europe SE, Sweden Branch. Where an analyst of UBS Europe SE, Sweden Branch has contributed to this document, the document is also deemed to have been prepared by UBS Europe SE, Sweden Branch. **South Africa:** Distributed by UBS South Africa (Pty) Limited (Registration No. 1995/011140/07), an authorised user of the JSE and an authorised Financial Services Provider (FSP 7328). **Saudi Arabia:** This document has been issued by UBS AG (and/or any of its subsidiaries, branches or affiliates), a public company limited by shares, incorporated in Switzerland with its registered offices at Aeschenvorstadt 1, CH-4051 Basel and Bahnhofstrasse 45, CH-8001 Zurich. This publication has been approved by UBS Saudi Arabia (a subsidiary of UBS AG), a Saudi closed joint stock company incorporated in the Kingdom of Saudi Arabia under commercial register number 1010257812 having its registered office at Tatweer Towers, P.O. Box 75724, Riyadh 11588, Kingdom of Saudi Arabia. UBS Saudi Arabia is authorized and regulated by the Capital Market Authority to conduct securities business under license number 08113-37. **UAE / Dubai:** The information distributed by UBS AG Dubai Branch is only intended for Professional Clients and/or Market Counterparties, as classified under the DFSA rulebook. No other person should act upon this material/communication. The information is not for further distribution within the United Arab Emirates. UBS AG Dubai Branch is regulated by the DFSA in the DIFC. UBS is not licensed to provide banking services in the UAE by the Central Bank of the UAE, nor is it licensed by the UAE Securities and Commodities Authority. **Israel:** This Material is distributed by UBS AG, London Branch. UBS Securities Israel Ltd is a licensed Investment Marketer that is supervised by the Israel Securities Authority (ISA). UBS AG, London Branch and its affiliates incorporated outside Israel are not licensed under the Israeli Advisory Law. UBS may engage among others in issuance of Financial Assets or in distribution of Financial Assets of other issuers for fees or other benefits. UBS AG, London Branch and its affiliates may prefer various Financial Assets to which they have or may have an Affiliation (as such term is defined under the Israeli Advisory Law). Nothing in this Material should be considered as investment advice under the Israeli Advisory Law. This Material is being issued only to and/or is directed only at persons who are Eligible Clients within the meaning of the Israeli Advisory Law, and this Material must not be furnished to, relied on or acted upon by any other persons. **United States:** Distributed to US persons by either UBS Securities LLC or by UBS Financial Services Inc., subsidiaries of UBS AG; or by a group, subsidiary or affiliate of UBS AG that is not registered as a US broker-dealer (a "non-US affiliate") to major US institutional investors only. UBS Securities LLC or UBS Financial Services Inc. accepts responsibility for the content of a report prepared by another non-US affiliate when distributed to US persons by UBS Securities LLC or UBS Financial Services Inc. All transactions by a US person in the securities mentioned in this report must be effected through UBS Securities LLC or UBS Financial Services Inc., and not through a non-US affiliate. UBS Securities LLC is not acting as a municipal advisor to any municipal entity or obligated person within the meaning of Section 15B of the Securities Exchange Act (the "Municipal Advisor Rule"), and the opinions or views contained herein are not intended to be, and do not constitute, advice within the meaning of the Municipal Advisor Rule. **Canada:** Distributed by UBS Securities Canada Inc., a registered investment dealer in Canada and a Member-Canadian Investor Protection Fund, or by another affiliate of UBS AG that is registered to conduct business in Canada or is otherwise exempt from registration. **Brazil:** Except as otherwise specified herein, this Material is prepared by UBS Brasil Corretora de Câmbio, Títulos e Valores Mobiliários S.A.¹ (UBS Brasil CCTVM) to persons who are eligible investors residing in Brazil, which are considered to be Professional Investors (Investidores Profissionais), as designated by the applicable regulation, mainly the CVM Resolution No. 30 from the 11th of May 2021 (determines the duty to verify the suitability of products, services and transactions with regards to the client's profile). UBS CCTVM is a subsidiary of UBS BB Servicos de Assessoria Financeira e Participacoes S.A. ("UBS BB"). UBS BB is an association between UBS AG and Banco do Brasil (through its subsidiary BB – Banco de Investimentos S.A.), of which UBS AG is the majority owner and which provides investment banking services and coverage in Brazil, Argentina, Paraguay, Peru and Uruguay. **Hong Kong:** Distributed by UBS Securities Asia Limited. Please contact local licensed persons of UBS Securities Asia Limited in respect of any matters arising from, or in connection with, the analysis or document. **Singapore:** Distributed by UBS Securities Pte. Ltd. [MCI (P) 026/08/2021 and Co. Reg. No.: 198500648C] or UBS AG, Singapore Branch. Please contact UBS Securities Pte. Ltd., an exempt financial adviser under the Singapore Financial Advisers Act (Cap. 110); or UBS AG, Singapore Branch, an exempt financial adviser under the Singapore Financial Advisers Act (Cap. 110) and a wholesale bank licensed under the Singapore Banking Act (Cap. 19) regulated by the Monetary Authority of Singapore, in respect of any matters arising from, or in connection with, the analysis or document. The recipients of this document represent and warrant that they are accredited and institutional investors as defined in the Securities and Futures Act (Cap. 289). **Japan:** Distributed by UBS Securities Japan Co., Ltd. to professional investors (except as otherwise permitted). Where this report has been prepared by UBS Securities Japan Co., Ltd., UBS Securities Japan Co., Ltd. is the author, publisher and distributor of the report.
